Languages

JavaScript, TypeScript, Python, PHP, Java, HTML5, CSS3

Frontend

React, React Native with Expo, Next.js, Vue.js, Angular, Tailwind CSS, Bootstrap

Backend

Django, DRF, Laravel, ColdFusion, GraphQL, REST

Data & Infra

PostgreSQL, MySQL, Redis, Celery, Docker, WebSockets

Platforms

Git, Linux, Nginx, LiteSpeed, cPanel, Cloudinary, JWT, Swagger

EDUCATION

B.Sc. Marketing

University of Ilorin, 2018 to 2020

National Diploma

Kwara State Polytechnic, 2014 to 2016

WAEC

Falomo High School, 2006 to 2013

LANGUAGES

English: Fluent
Yoruba: Native

MUHAMMED KAMIL BABATUNDE

SENIOR FULL-STACK SOFTWARE ENGINEER

TECHNICAL LEAD AND FOUNDING ENGINEER, SPRINT AFRICA LOGISTICS

PROFILE

Full-stack software engineer with 6+ years of experience shipping production systems end to end, from database and API architecture through to native mobile apps. Sole architect and builder of Sprint Africa Logistics, having designed and built the entire backend, web platform, and mobile app solo in under six months between February and July 2026. The platform is now live with registered users and early investor backing as the business moves into its growth phase. Polyglot across Python and Django, PHP, Java, and ColdFusion on the backend, and React, Vue, Angular, and React Native with Expo on the frontend. Delivered an internal banking automation system used by over 300,000 users at Wema Bank, plus fintech, real estate, and education platforms for freelance clients. Transitioned into engineering from a Marketing degree through hands-on enterprise and freelance work, and equally comfortable owning architecture independently or leading a team to delivery.

PROFESSIONAL EXPERIENCE

Founding Engineer | *Sprint Africa Logistics (sprintafrica.com.ng)*

February 2026 to Present

Sole full-stack developer and architect for the entire platform.

- Designed and built a full logistics and delivery platform covering backend, web, and mobile, solo, from first commit to a live product in under six months between February 13 and July 31, 2026, and have continued to iterate on it since.
- Built the Django REST Framework backend using PostgreSQL, Redis, and Celery to power courier dispatch, wallet and payments, shipment lifecycle, and hub operations.
- Led development of five role-based React and TypeScript dashboards, including Admin, Customer, Courier, Customer Service, and Super Admin, built with Vite and Tailwind CSS.
- Shipped a React Native mobile app built with Expo for Android and iOS, featuring real-time tracking, push notifications, an in-app wallet, live chat, and maps.
- Onboarded the platform's first registered users while the business development side continues to grow, and secured early investor backing ahead of scale.
- Designed a real-time analytics and BI platform with geolocation and device and session tracking, plus PDF, Excel, and CSV export, while owning full DevOps and cPanel and LiteSpeed deployment.

Senior Full-Stack Engineer | *Independent / Freelance Contracts*

2024 to 2026

- Sabo Finance: built a peer-to-peer fintech web platform using React, TypeScript, and Vite, with authentication and live Django API integrations.
- BIMFlow Suite: built a Django backend for IFC and BIM engineering file processing, exposing GraphQL and REST APIs for project collaboration.
- meCash: delivered a Vue.js and Java fintech platform with wallet functionality and a financial dashboard.
- Beapir: led a peer-to-peer MVP build with an Angular frontend and a Python Django backend, including authentication and REST integration.
- SkyEdu: built a full-stack education management platform covering student, staff, and administrative workflows.

ColdFusion Developer | *Wema Bank (Enterprise Systems, Nigerian Commercial Bank)*

2023 to 2024

- Built and maintained an internal enterprise application using ColdFusion and MySQL, used by over 300,000 users to automate data input, plus a scalable order management system.
- Integrated third-party APIs across enterprise workflows and reporting.
- Upgraded legacy ColdFusion applications and frameworks to meet evolving business requirements.

Junior Web Developer | *Various Clients*

2020 to 2023

- Built web applications with HTML, CSS, and JavaScript, improving user engagement by 30% and cutting page load time by 20%.
- Led a five-developer team migrating a legacy system to a modern stack, improving performance, security, and user satisfaction.
- Delivered frontend builds for propertyslice.com, raspibtech.com, healthmanagement.com, and the SkyEdu education platform.

SELECTED PERSONAL & PORTFOLIO PROJECTS

- LuxePrime: real estate marketing platform
- Eleftheros: consultancy business website
- Ebullient: photography portfolio and booking site
- ManaToGo: food ordering frontend
- Courage Royal Logistics / CourageFarm: logistics and agribusiness sites
- Umami Fragrance: e-commerce storefront
